The Greatest Dot-to-Dot
Why Dot-to-Dots?

Once upon a time, the first dot-to-dot was imagined in the nighttime sky. Discovering the first "printed" dot-to-dot is an ongoing quest, but they have certainly entertained people for a long time. Nothing quite compares to the sense of magic you experience as you see an image form out of chaos right before your eyes - an image that you draw youself.

Since 2000 Monkeying Around and David Kalvitis have been dedicated to offering innovative dot-to-dot products that will delight and entertain children and adults of all ages. These fun-filled books have received numerous awards throughout the years and provide hours of family fun.

It's incredible learning how our books have been used: for fun and enjoyment, of course, but also to **relieve stress**, for **physical therapy**, and helping with **alzheimer's**, **dimentia**, and the **home-bound**. Teachers recommend them for **educational purposes** such as **learning numbers**, **sequencing**, **mathematics**, **compass directions** and **coordinates**, as well as **following directions** and **learning patience**.

The Greatest Dot-to-Dot
# How Are We Different?

Types and Styles

The first challenging dot-to-dots ever created were designed by David Kalvitis and published through his company, Monkeying Around, in 2000. **Before that time, complex dot-to-dots did not exist**. These puzzles number well into the hundreds and include new variations. Each subsequent book brings new styles, higher numbers, and multi-page puzzles.

In the **Odd/Even** puzzle, connect all the odd numbers and then all the even numbers separately to reveal the correct image.

David wanted to invent a different kind of pattern, and **Arrows** was born. Easy for kids, but tricky for adults to simply follow the arrows.

Want a new challenge? Try connecting three-letter words in alphabetical order. In **Alpha Dots**, group your words and organize them.

In a sea of **Numbers** you must find the right ones to connect. Once you begin to relax and focus the numbers jump right out at you.

In the **Compass** puzzle, follow a list of clues to complete your final image. It's a great way for kids to learn directions.

Field of Dots first appeared in Book 1. In the second series the grid got denser and more clues added to the images' complexity.

"These are the best dot-to-dot puzzles we've found. My son is essentially the judge… he explains that the 'Greatest' series is the most fun. Why? Because there are lots of different types of dot-to-dot challenges…" – Scott, January 18, 2013

Crazy Dots, or connecting symbols, is one of David's most popular designs. Connect each symbol to the next, and check it off the list.
A dot-to-dot **Scene**, invented by David, looks like numbered popcorn, ants, beans, buttons, paws, confetti, or snowflakes that need connecting.

Crisp and Clean

We use a classic font, and dots and numbers are meticulously placed for maximum visibility.
